

Knowio: The Smarter Way to Secure Gates, Yards & Remote Sites

Managing who has access to your gates, compounds, and yards shouldn't be complicated—or expensive. That's why forward-thinking companies are switching to [Knowio](#), a truly scalable, remote access control system built for today's mobile, multi-site operations.

With Knowio, you'll never wonder again who opened a gate, left one unlocked, or failed to disarm a system. Everything is logged, traceable, and visible in real-time—right from your phone.

Real-Time Control, Right in Your Pocket

Traditional keyholding and site checks are inefficient, error-prone, and expensive. Knowio solves that by letting you:

- Get real-time alerts when gates are opened or left open.
 - Create or revoke user access in seconds via the Knowio app.
 - View detailed audit trails and activity logs for all sites and users.
 - Choose between self-monitoring or professional third-party monitoring.
-

Designed for Sites with 1 Gate—or 1000

Whether you're a single storage yard operator or a nationwide construction company, Knowio's modular architecture gives you the flexibility to grow.

- Electric gates? Use the smart controller + sensors.
- Manual padlocked gates? Use Knowio's long-life IoT padlocks + sensors.
- Multiple locations? Seamlessly switch between them in the app.

Learn more on our [Solutions page](#) about how Knowio works in environments like [Construction](#), [Utilities](#), or [Self-Storage](#).

Built for the Toughest Environments

Knowio was designed from the ground up for reliability and ruggedness:

- Battery-powered padlocks work without mobile signal.
 - 99.2% IoT network coverage ensures near-universal reach.
 - Hardware is built to withstand outdoor, rural, or industrial settings.
-

Real Customers. Real Results.

We now have visibility on gates we used to physically check. That alone saves hours weekly.

— Mick Power, Coillte Forestry

Access changes daily. Knowio makes managing our car parks and stock yards seamless.

— Alan Moore, Spirit Motor Group

Incidents of gates left open have dropped to zero.

— Sean MacMahon, MACM (NI)

Partner With Us or Get Started Today

Whether you're managing a growing fleet of sites or just tired of sharing keys, Knowio helps you take back control of your perimeter security.
